Customer Sales MIS Report – Electronics Retail

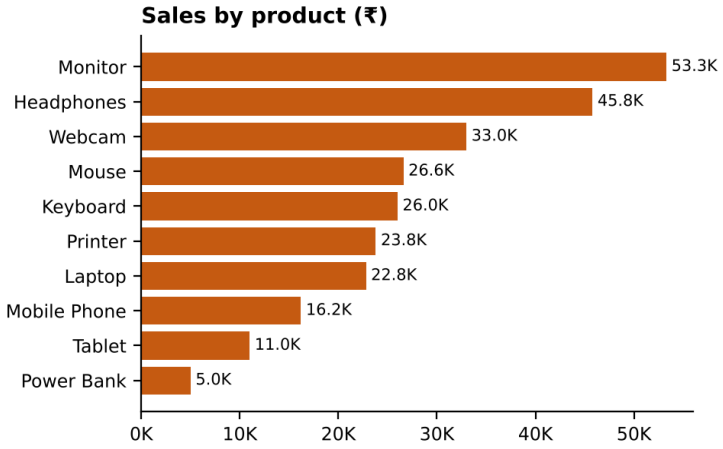

January – August 2026 · 49 orders · 10 cities in North India · MS Excel practice project · Aditya Kushwaha

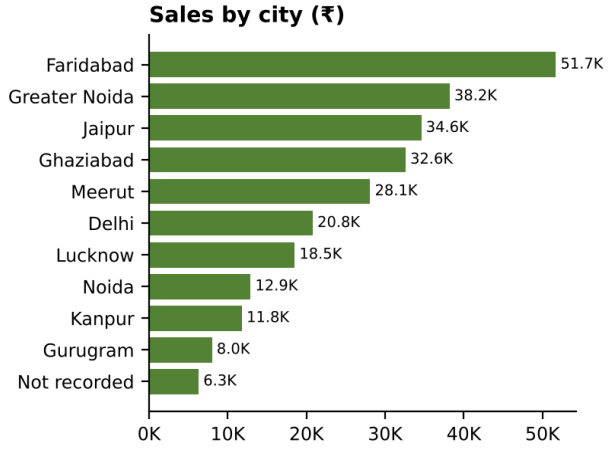

Total Sales	Orders	Avg Order Value	Largest Order	Orders ≥ ₹9,999	Share ≥ ₹9,999
₹263,451	49	₹5,377	₹15,999	12	61.5%

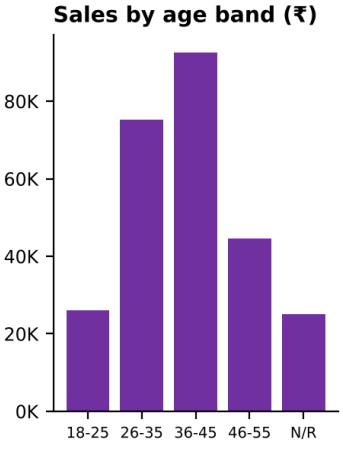

Key findings

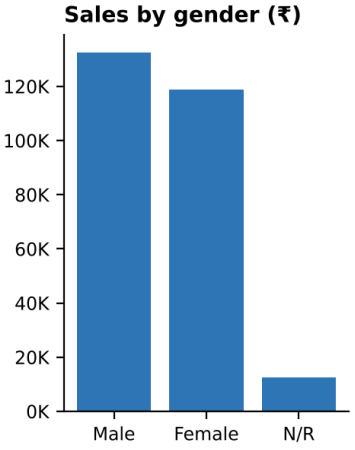

- Total sales of **₹263,451** from 49 orders; average order value ₹5,377.
- **April is the peak month** with ₹90,887 (34.5% of sales) from 13 orders; February and August had one order each.
- **Faridabad** leads cities with ₹51,693 (19.6%). **Monitors** lead products by value (₹53,292), while **Headphones** have the most orders (11).
- **12 orders of ₹9,999 or more make up 61.5% of sales**: revenue depends on a few high-value orders.
- Customers aged **36–45** bring the most sales: ₹92,487 (35.1%).
- **7 of 49 records (14%) needed cleaning** before any figure could be reported.

Summary tables

Month	Orders	Sales (₹)	Share
Jan	9	44,991	17.1%
Feb	1	4,999	1.9%
Mar	6	17,094	6.5%
Apr	13	90,887	34.5%
May	5	40,295	15.3%
Jun	5	9,695	3.7%
Jul	9	52,491	19.9%
Aug	1	2,999	1.1%
Total	**49**	**263,451**	**100.0%**

City	Orders	Sales (₹)	Share
Faridabad	7	51,693	19.6%
Greater Noida	7	38,193	14.5%
Jaipur	5	34,595	13.1%
Ghaziabad	4	32,596	12.4%
Meerut	5	28,095	10.7%
Delhi	5	20,795	7.9%
Lucknow	2	18,498	7.0%
Noida	6	12,894	4.9%
Kanpur	4	11,796	4.5%
Gurugram	2	7,998	3.0%
Not recorded	2	6,298	2.4%
Total	**49**	**263,451**	**100.0%**

Product	Orders	Sales (₹)	Share
Monitor	8	53,292	20.2%
Headphones	11	45,789	17.4%
Webcam	8	32,992	12.5%
Mouse	5	26,595	10.1%
Keyboard	2	25,998	9.9%
Printer	3	23,797	9.0%
Laptop	3	22,797	8.7%
Mobile Phone	5	16,195	6.1%
Tablet	3	10,997	4.2%
Power Bank	1	4,999	1.9%
Total	**49**	**263,451**	**100.0%**

Age band	Orders	Sales (₹)	Share
18-25	4	25,996	9.9%
26-35	13	75,187	28.5%
36-45	13	92,487	35.1%
46-55	14	44,686	17.0%
Not recorded	5	25,095	9.5%
Total	**49**	**263,451**	**100.0%**

Data quality and cleaning

The source sheet was checked column by column. Every order was kept in the sales totals; records whose customer details could not be trusted were flagged, not guessed. Also removed: an empty AI-function cell returning an error message, broken pivot sheets and a sheet of broken references. CUST008 is missing from the source ID sequence and was not invented.

Check	Issues	Fix applied
Header text inside data	1	Order kept; ID re-keyed to CUST010; details Not recorded
Rows sharing a duplicate Customer ID	4	2 pairs (CUST001, CUST002): later rows re-keyed to CUST011 / CUST012
Non-whole ages	2	Belong to the re-keyed rows; age marked Not verified
Age "N/A"	2	Left blank; excluded from age bands
Gender blank	1	Marked Not recorded
City "N/A"	1	Marked Not recorded
Phone missing	2	Contact fields not used in analysis; removed for privacy
Email missing	3	Contact fields not used in analysis; removed for privacy
Missing order value or date	0	None – all 49 orders usable

Recommendations

- Add data validation (drop-down lists, whole-number age, unique Customer ID) at the point of entry so header rows, duplicates and "N/A" text cannot be typed in.
- Track high-value orders (₹9,999+) separately: they drive most of the revenue, so their volume is the first number to watch each month.
- Investigate the April peak and the weak February, June and August months before planning stock and promotions.
- Check product prices against a price list: values such as a ₹15,999 mouse or a ₹799 laptop suggest entry errors in this sample data.

Workbook: Customer_Sales_MIS_Report.xlsx. Dashboard figures are SUMIFS / COUNTIFS formulas on Clean Data. Contact details replaced with Present / Missing flags. Sample data.
